Profile

Above all I love problem solving. The harder the puzzle the more rewarding it is to solve. I approach problems head on looking for the fastest solve and if that doesn't pan out, I work the problem in reverse and come at it from another angle.

Highlights

Desire to utilize an existing skillset to build, admin, maintain, and improve in-house productivity solutions.

6 years tech company/startup experience.

10+ years customer service experience.

Passionate about creating low-cost productivity applications to support the business.

Engineering Experience

Yelp Inc.

Work Experience

2013-Present

I currently work full-time for Yelp as an Application Engineer. My day-to-day work consists of troubleshooting advanced issues, administrating, configuring, and deploying workforce productivity tools, controlling access to applications and sensitive information, and building out new solutions to old problems or refining existing solutions to take them from the initial problem solution stage to enterprise grade tool.

2005-2013 UPS Inc.

For five years during my tenure at UPS I drove the brown truck and interacted directly with customers as the face of UPS. I drove safely and never accrued a single accident.

Education

2015-Present (Expected Graduation March 2020) ASU Online - Studying Graphic Design/Web Design

2012-2014 Mesa Community College - Studied Web Design

2006-2009 Mesa Community College - General Studies

2000-2004 Hamilton High School - Diploma

Skills

Programming

Python, JavaScript, Powershell, LDAP, CSS, HTML, SQL

Applications

G Suite, Okta Single Sign-On, Jira, Confluence, Slack, LastPass, Statuspage, PagerDuty, Teem, Envoy, Box, AWS
